

Performance

The Heartbeat of any Business

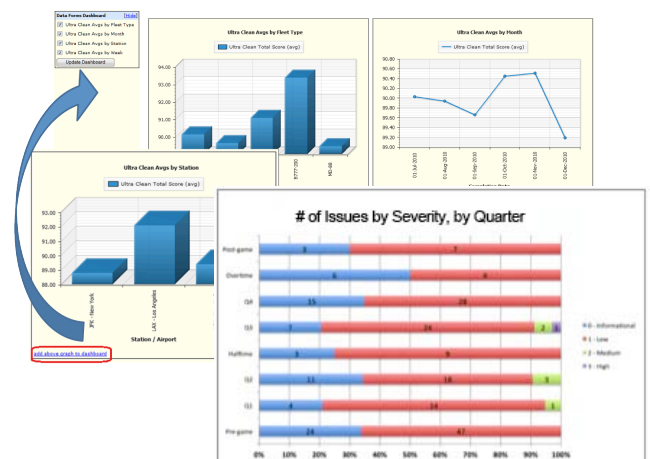

Performance drives growth, profitability, brand protection, compliance and morale!

Prism eSolutions is a unique organization that will improve your company's performance in three critical areas:

- √ Compliance to customer satisfaction, quality, regulatory requirements and internal standards.
- √ Supplier performance standards, metrics, inspections and audits to ensure value to you and your customers.
- √ Certification and documentation to standards, processes, quality and training.

Our uniqueness is defined by highly skilled professionals who will come on site and provide a gap analysis of your current performance in these critical areas. We will also provide independent auditors and inspectors to give you a fresh set of eyes to evaluate your and/or your suppliers' performance.

Our web-based business management software, equation[®] ASP, will track, document, measure and drive improvements. You can have real-time dashboards, heat maps, charts and graphs for at-a-glance summaries of performance metrics.

Call us today for an introduction to Prism, and learn how we can help you!
